

THE GLEICHEN CALL

VOLUME XXXI NO.

NO. 19

GLEICHEN, ALBERTA, WEDNESDAY JULY 27, 1938

SUBSCRIPTION \$2.00 PER YEAR

BLACKFOOT M. D. COUNCILLORS IN REGULAR SESSION

The Blackfoot municipal council held their seventh meeting for this year, with Reeve Thorson, Deputy Reeve Underhill and Councillors Nelson, Westley and McArthur present.

O. D. Christensen and Alfred Hansen, who were invited to the meeting, advised that this was machine work and it would necessitate the moving of the power outfit, south which would make the work costly. The council left the matter in the hands of Councillor Westley for attention and Mr. Westley will discuss the matter further with the delegation and what he could do.

W. O. Crowe was badly burned, burst from sodium lights, fire at 8 p.m. on July 26th. He reached home from spraying hoary trees and was proceeding to change his clothing when they ignited from friction. Councillor Westley was called and he called for Dr. Fletcher of Stand and Mr. Crowe's burns were dressed. He was conveyed to the Calgary General Hospital and left in charge of Dr. Richardson. W. O. Crowe, Mayor was present and advised the workmen engaged in spraying hoary trees with this chemical were wearing loose clothes and their hair was loose. Clothing was being washed out regularly and changed when work ceased.

The secretary of the local board of health reported on the Hamlet of Chaffellier. The place was clean but could be improved if two parties would remove old car parts and old machinery to the nuisance ground. This would eliminate dumping of rubbish on things at the nuisance ground. It allowed to continue will render the driveway impassable and it will be either a case of more land being appropriated or the rubbish on the things pushed over the curb bank. The writer was of the opinion that the council would be well advised to deal with the matter at once by having the rubbish pushed over the curb bank. The council accepted the report of the health board and the commendations will be carried out.

Weed Inspector Naylor discussed the hoary tree situation with the council. He had attempted to remove in Calgary. It was decided to order another ton of sodium chlorate.

Councillor Nelson carried out the following motion: "We enter into an agreement with the owner, occupant of 60 acres of land badly infested with hoary trees, to permit experimental purposes. The owner agrees to allow the municipality to experiment on said 60 acres of land by the use of chemical sprays by cultivation until the hoary trees growing there are eradicated. The owner will not be paid for the use of this land for experimental purposes, neither shall he be charged for the eradication of the weed. The designation of the land to be taken over for the experimental purposes shall be left to the Reeve and the Deputy Reeve to name and police eradication shall also be left to them in cooperation with the weed inspector, provincial weed supervisor and the department of agriculture. Edmonton as the situation warrants the Department of Agriculture and the Canadian Pacific Railway Company, D. N.R. be petitioned to cooperate with the district in the experiments by way of assuming some share of the expense and as a tentative proposal we offer the suggestion that each party so named assume one-third of the expense."

The secretary was instructed to proceed with the assessment and to obtain office help for the next three months.

The following amounts were allocated to public works from the 1938 revenue:

Division 1,	990.12
Division 2,	897.84
Division 3,	1,027.17
Division 4,	886.23
Division 5,	849.50
Division 6,	878.45

Division 2, 650.00

News Items of Local Interest

Edgar Taylor left for Olds Saturday to attend summer school for a short time.

Mr. and Mrs. McQueen left Friday for the coast for a short holiday.

Miss A. Evans, who has been with the staff of the Misericordia hospital, Edmonton for the past year, is spending her holidays in Glenora.

Mrs. N. Riddell and son Bobbie, after a week or so visiting friends in Three Hills, they returned home over the week end.

Miss V. Taylor returned home Saturday evening from Calgary. While in the city Miss Taylor had her application accepted to enter the hospital to train as a nurse.

During the electrical storm one night last week lightning struck and knocked out a number of bricks on the big brick chimney at Old Sun school.

Mr. Moore of Kamusack Sask., has been in town for the past week visiting his mother Mrs. Moore and sister Mrs. L. Michael. Mr. Moore pays a visit every year about this time.

It is stated that Allen O'Bray, who has been injured in a crash wagon, when his outfit was wrecked at River Valley some weeks ago, is making good progress towards recovery.

COMMON SALT PREVENTS HEAT EXHAUSTION

The severe muscle cramps which occur among workers exposed to unusually high temperatures, are common among steel workers, millwrights, men and ship-stokers. They are sometimes called "heat cramps" or "miner's cramps." While the existence of these muscular pains has been known to occur it was left to J. S. Haldane, the eminent English physiologist, to suggest that the condition was caused by the loss of salt in the process of sweating. An Englishman, K. N. Monk, had previously pointed out that sailors voluntarily ate more salty food during extreme hot weather.

Most people are aware of the symptoms of heat exhaustion. These are general depression, headache, dizziness, nausea, diarrhoea and stomach distress. In the severe form muscle cramps occur as well. As a result of Haldane's suggestion, a group of nine workers was induced to try the salty water. The results were magical. There were no further attacks of cramps and much less complaint of fatigue than formerly. A similar experiment made in Russia showed that when salt was administered to persons working in high temperatures there were less subject to fatigue and heat exhaustion.

The objection to this form of treatment is the salty taste. This has been overcome by the use of 5 grain salt tablets to which, as further improvement, 5 grains of dextrose are added.

In the Journal of Industrial Hygiene are given some interesting data on the loss of salt taken in table salt form by workers in a large steel plant. There were some 3,500 men at work in the plant. During one summer the heat cramps were responsible for the loss of 48 working days among this group. The use of salt was beneficial in the following year: the salt taken that only nine days were lost. The next year the loss was but four days and the year after none.

The means of prevention of the ill effects of heat exhaustion are simple. Ordinarily the use of 5 grains of salt with each drink of water is ample. Try it.

every and expects to leave the hospital soon.

Friday was a real hot day. Local thermometers registering 95° in the shade. A slight breeze helped to ease the suffering from the intense heat. Saturday was much cooler, smoke from forest fires keeping the air out of sight during most of the day. Sunday was cool and in the evening it was quite chilly.

Jack Lester, the town engineer, has installed a new sidewalk running by The Call office. When he ripped up the old sidewalk he did not find any loose silver but he did find some old Larkin and Larkin bread tickets made of metal. Jack has since been wondering how he could cash in on them. With the new sidewalk down the danger is at an end of boards flying upwards when one steps on them and getting a black eye or a fastened nose.

John F. Nixon of Eventide Home died last Thursday at the age of 85 years. Deceased had been in the home for only about a month having come from Calgary. He was born in England and came direct to Alberta some 27 years ago. By trade he was an embosser in cloth. Funeral services were conducted by Rev. J. N. Wilkinson of the United Church of Canada, at the home of the deceased, after the service, where that interest was met in Eventide cemetery.

OBITUARY

MRS. ANNIE PATTERSON

Mrs. Annie Patterson died at her home north of Arrowwood Friday morning, after an illness of three years. Deceased was born at Inverness, Quebec on Jan. 19, 1877. In 1895 she was married to Herbert Patterson to which union four children were born. In 1909 with her husband and family moved to Glenora where they resided until 1913 when they moved to the farm at Arrowwood where Mrs. Patterson resided until her death.

The funeral service was conducted in the United Church, Glenora at 3 o'clock Sunday afternoon with Rev. J. N. Wilkinson officiating after which interment was made in the local cemetery beside her husband who predeceased her 21 years ago. Three sons, Earnest Herbert and Eugene and grandson, Rupert Hunter, acted as pallbearers.

Mrs. Patterson's father was John Kingsborough and her mother's maiden name was Margaret Moore, both natives of Ireland. Deceased is survived by one daughter, Mrs. Geo. W. Hunter, of Glenora, and three sons: Earnest Herbert and Eugene at home; a sister living in New Hampshire; grandchildren: Mr. Rupert Hunter, Mrs. Anna Roache, Miss Della Hunter of Glenora and Mrs. Ivy Fraser of Standard; great grand children Donald and Dale Hunter and Sterling Roache.

Among the floral offerings the following were noted: The family; Grand children; Mr. and Mrs. V. Leadbetter; Mrs. McConnell and Jean; Mr. and Mrs. Shultz; Mr. and Mrs. Leith and Donald.

THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan"

This is the proud year for one of the oldest and purest races of white people in the world. I mean our good friends the Swedes.

1938 is the 300th anniversary of the first settlement of the Swedish people on the American continent. They have since successfully colonized large areas in the United States and in Canada.

Tactius, the great Roman historian in 68 A.D., 1560 years ago, wrote of the sturdy Swedes under a strong king, cultivating wheat and other products of the soil with industry and patience.

Intelligent hard workers, good citizens and loyal kind friends, the Swedish people have added much to the wealth of the United States

22ND BATTERY BOYS RETURN WITH SPORT HONORS

The 22nd Field Battery R. C. A. under the command of Major H. Dodson, returned from Camp Shilo, Miss. after spending a successful 10 days training. They report having had a wonderful time, and were also to the front in the way of sports which were held on Friday afternoon. They played the R.C.A. of Winnipeg a seven innings baseball game and were defeated by the close score of 4-3. The boys then took part in the brigade tug-of-war. Drawn against the 1st Battery of Calgary they won two pulls out of three. In the final they pulled the 96th Battery which the 22nd has held for four years. It was the same old story the 22nd won by a score of 22-8. The cup will remain with the local lads for another year.

LOCAL SOCIAL CREDIT GROUP HOLD SPORTS DAY

The garden of Mrs. Betsy McMillan's home was the setting for the regular semi-monthly meeting of the Meadowbrook Social Credit Group and annual picnic and sports day. About fifty members and friends were present.

Mrs. Nelson, the president, occupied the chair. The roll call was answered by "My Favorite Sportsman. The minutes of the last meeting were read by the secretary and on motion were adopted.

Mrs. Nelson announced that a telephone call had been received from Mr. McCune, our representative, stating that he wished to address a meeting here, in the interests of "Truth and True Democracy." He stated that he would be accompanied by Floyd M. Baker, M.L.A., secretary Social Credit Board. This meeting will be held at the home of Mr. Tom Wilson 2 p.m. on Wednesday afternoon, July 27th. It is a public meeting and all members and friends of the district are cordially invited to attend.

The meeting then adjourned and went to the garden. The sports committee, Lois Boucher, secretary and Peggy McArthur, had charge of the arrangements and a very fine program was enjoyed by all, and prizes awarded.

A splendid lunch was then placed on the table in the garden by the hostess and her assistants.

Mrs. John Wilson will be hostess at the next meeting scheduled to be held on August 4th, assisted by Mrs. Tom Wilson.

GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister.

Instead of the regular service at Arrowwood and Glenora there will be a joint service near the Arrowwood bridge on the Bow River at 7:30 p.m. The Salvation Army Band from Eventide Home will be in attendance and take part in the service. The address will be on the theme, "What do you get from life?"

If the weather should be unfit for an open air service the regular service will be held in Glenora at 7:30 p.m.

and Canada, and so have enhanced the welfare of the two peoples.

It is interesting to note too, that 1938 is also the 100th anniversary of the death of the great Swedish botanist Linnaeus, who originated an entirely new method for the classification of plants; which new method helped much towards the development of all farm crops. Swafol, true to the heritage left by Linnaeus, today is one of the world's greatest plant breeding institutions.

From Swafol came Victory oats, so much prized in Canada.

So hats off this year, 1938 to the Swedes in token of their accomplishments, and say thank to them whenever the opportunity offers.

Following factors, which have tended to raise price: Government attempting to reduce U.S. wheat acreage 32 per cent. Poland considering

Illustrated His Point

Toronto Professor Has New Idea For Penitentiaries And Mental Hospitals

Men and women confined in penitentiaries and asylums would undoubtedly emerge as better citizens if they were allowed to establish their own social organization inside the walls and run it themselves, the American Association for the Advancement of Science was advised.

Professor J. D. Ketchum of the University of Toronto told the association's psychology section that a group of human beings thrown together in close confinement will, if given the chance, work out their own system of living, work, culture and mental development.

As an illustration he declared that when 3,000 men, of which he was one, were confined to the Rubenstein internment camp in Germany throughout the World War they developed in short time an almost perfect social organization. Day laborers, diplomats, army and navy officers, enlisted men, members of the English peerage and many others were thrown into the lodge-podge of the concentration camp and forced to exist in stables over a hundred men in a stall built to accommodate one horse, Professor Ketchum declared.

Instead of sinking into despair over their lot the men soon developed a social organization, elected their leaders, organized camp activities including cricket and other sports, and in general adapted themselves to their surroundings.

"For the whole 'Rubenstein' complex just four amazingly interesting and stimulating years which I would not have missed for anything," declared Ketchum.

Such a prison system might change the attitude and social behavior of many criminals, just as it changed many of the men confined in the Rubenstein concentration camp, he added.

The Other Side

Official Report Shows Hospitals Receive Small Part Of Sweptstakes

Recent news dispatches from Dublin in contradiction to no uncertain way expressed the general impression that the Eire hospitals have been placed in a sound financial position due to the millions of pounds of prize money.

An official report, published the other day in Dublin, reveals that out of more than £10,000,000 available for the Irish hospitals from the sweepstakes of Dec. 31, 1929, less than £3,000,000 had been paid out to them.

In the sweep on the Grant National on March 25 last, for example, the total receipts were £274,002, of which £161,520 was prize money, the hospital share being only £508, 17s.

Where did the other big amount go? Did nearly £1 million go to the state or in expenses?—Halifax Herald.

Young Scientist Honored

Receives One Of Highest Honors For Valuable Discoveries

One of the world's youngest scientists, 28-year-old Dr. Charles F. Wood, of the University of Minnesota, was awarded the Theobald Smith medal of the American Association for the Advancement of Science.

The award, one of the highest honors in American science, was made to Dr. Wood, native of Winnipeg, in recognition of his discovery that the chemical histamine is normally present in the human body and when present in abnormal amounts indicates tubercular infection or an allergic reaction to the presence of foreign protein in the body.

Pleasure Short-Lived

A salesman who had been traveling on a certain railroad for a number of years was complaining about the trains always being late, when to his surprise, the train came in.

He immediately went to the conductor and said, "Here's a cigar. I want to congratulate you. I've traveled on this train for 15 years, and this is the first time I ever caught a train on time."

"Keep the cigar," said the conductor, "this is yesterday's train."

A stone coffin containing laurel leaves and a skeleton believed to be that of a 13th century abbot was discovered in the ruined chapter house of the monastery at Arbroath, Scotland.

"Who is bearing the white man's burden to-day?" asks a lecturer. We'll have a guess: a gnat cadaver.

There is no fire in volcanoes, molten lava causes the glow. 2263

Once you sweeten your morning cereal with BEE HIVE Syrup you'll know how good cereal can taste.

TRY IT TOMORROW

Enjoying Life

Judge Wants To Know At What Age One Has The Greatest Happiness

Mr. Justice Langton wants to know the men about happiness to help in assessing damages for loss of expectation of life.

He said as much in admiralty court hearing cross-appeals from compensation awards for relatives of nine drowned seamen.

"Some men enjoy life when they are most miserable," he remarked. "Men who have the most miserable existence have enjoyed it infinitely more than men who had a sheltered, comfortable and untroubled career."

O. L. Bateson, one of counsel in the case, suggested a young man enjoyed more of life than older man and compensation should therefore be on a more generous scale.

"I do not think a person enjoys life more at 23 than at 44," returned Mr. Justice Langton.

"I do not know whether the mill-holmgate of the dutman has the best of it," he continued. "There must be dutmen who regard life a much better thing than does the judge and careworn millionaire who is disillusioned and miserable about everything."

He recalled one court which awarded £1,000 (\$5,000) to a man of 70 taking into account the added zest imparted to life by the fact he played golf.

"Are we to make it more valuable to lose a husband than to retain him?" asked Mr. Justice Langton.

No Insects Allowed

Trans-Atlantic Airlines To Have Sprinkling System For Pests

Bugs will not be permitted to hitch-hike on the trans-Atlantic air-line, the United States Commerce Department said. A report from the American commercial attaché at London said that Imperial Airways has developed an insecticide sprinkling system designed to rid aircraft of all insects pests. Imperial Airways and Pan American Airways are to inaugurate joint service between Great Britain and the United States this fall.

Curses Of Yesterday

During an intermission at a party, some prominent business men were discussing an absent member. Few could find anything pleasant to say about the person in question. One guest, who had worked his way to success up the ladder of many misadventures and failures, said that "I remember me of about 20 years I once memorized from Dr. Isaac Goldberg's 'Tin Pan Alley.' Snobbery is but a pain in the neck. Let us have patience with our inferiors, they are ourselves of yesterday."

Albino has been known to occur among the colored races of man.

Lizards are slimy to the touch, but snakes have dry scales.

Must Choose Your Own

No Standard Diet For Arthritis According To Specialist

When a well known doctor, one moreover who specializes on the subject, says that "red" meat won't hurt you, it is worth listening to. From that news, Dr. Douglas Taylor's pronouncement to that effect, made before setting out to attend a convention in Halifax at which rheumatism was expertly discussed, should set the heater on fire with a vengeance.

For we have always been taught, generation after generation of us, that meat is bad for rheumatism subjects, and red meat something worse than merely bad. Every one that way inclined, from the first creaky twinges to the stage of gaunt and burning joints, has been told by the family physician or the specialist expert to cut from his diet certain things, chief among them red meats of every kind.

And such a long course Dr. Taylor and blows that venerable belief sky-high. There is, it appears, no such thing as a standard diet for arthritis. You work out your own system of fitting your diet into your own brand of rheumatism.—Montreal Star.

Must Be Acquired

Good Taste Grows From Effort To Appreciate The Best

C. E. M. Joad, in Scribner's, states good taste is not instinctive, but acquired. All native tastes are bad. The taste of the young in music is abominable, in literature execrable.

Good taste grows slowly through the effort to understand what is beyond us, the endeavor to appreciate what we cannot yet understand. It depends on the willingness to be wrong.

It is good to know that we may become bored with what is bad, so demand something better. In short, it is born of faith, the faith that kingdom of beauty can neither be purchased by dollars nor taken by force. It is born of the faith that the process of trial and error, a willingness to learn, and the humility which will not be approached by the judgment of others what it can not yet dare to reject on its own.

Provided New Words

Several Things Have Been Named After English Peers

According to the *Yorkshire Mail*, some of those amiable Englishmen who write to the newspapers have discovered a new word, *Naigle*, which English peers have had their names turned into new words in the language? The origin, of course, would be the Earl of Sandwich, who wouldn't leave the gaming table, ordered some meat between bread brought in, and achieved an unexpected fame thereby.

But there are apparently quite a lot of others, including the Earl of Cardigan, who got a sweeter name after him, the Duke of Wellington, who was called a pug, and a cocking apple, and a certain Crimean war general named Raglan, who turned out to be an overcoat.

The Streamlined Potato

Will Have No Deep Eyes And Be Easier To Peel

The work of the professional plant breeder is not designed to add a farmer alone. "Streamlining" of a horse has been followed by the idea of the streamlined potato. Such a variety is one of the chief goals of potato specialists everywhere.

This streamlining is the elimination of deep eyes that cause much waste during peeling. Besides being more economical, the new shal-low-eyed varieties may be peeled with greater speed.

Like the streamlining of cars, the streamlining of deep-eyed potatoes is a gradual process. Our latest varieties are improvements, but still shal-low-eyed may be expected in later models.—Scientific American.

Underground Post Office

South Australian Post Field Has Only One In World

Cooper Pedy, the remote South Australian opal field, possesses the only underground post office in the world. The prospectors live in "rooms" dug into the soft earth, the low sandstone hills. Here, too, is their bank and their post office. Cooper Pedy is the aboriginal name for white man's burrow.

Mechanized Viewpoint Modern transport, print and film are creating in England what Earl Baldwin describes as a "standardized suburban mechanism."

Already there too much of that here, states the Farmer's Advocate. Rural people accept all too placidly the urban viewpoint, and a wholesome rural independence is becoming articulate.

FOR ANY TYPE OF HOUSE

For inexpensive homes or elaborate mansions, architects and contractors are recommending

GYPROC FIRE PROOF WALL BOARD for interior walls and ceilings.

Owners recognize the many advantages of using GYPROC. It is fire-proof—will not burn.

It will not crack, warp or sag. It provides a smooth, seamless surface—perfect for any decoration.

It makes up building—is economical.

It costs no more than other and inferior materials.

GYPROC FIRE PROOF WALL BOARD

Might Reverse Decision

Question Whether Judge Would Apply Case To Himself

A recent legal decision in the United States has fallen upon jaded sports writers like a bomb from heaven. It appears that the umpire at a ball game in a West Virginia town called a strike. The batter felt differently about it, made a protest and followed it up with a punch on the nose. The umpire took the case to court.

After hearing the testimony, the judge dismissed the case with the remark, "It is the individual prerogative of a baseball player to get mad and have a fight with the umpire."

The judge has had his little dig, but we are wondering what his reaction would be if some litigious athlete exercised his inalienable right to get mad at a decision and took a punch at the judge himself. Perhaps it might occur to the umpire's league to make a test case.

Our Pioneer Forefathers

Could Tell Youth Of To-day That Life Is Never Easy

Our young people to-day, if they possess anything of the spirit of their pioneering forefathers, will not feel too sorry for themselves in what they may think of their plight, says the Ottawa Journal. Their lot may seem hard, but it is not as hard as was the lot of their fathers, most of whom never knew the education nor the care nor the comforts which go to so many young people to-day. Let them remember that life, at best, isn't easy; that it is an endless adventure, a hard and long battle with unfavorable odds. To take the place without the dust is to ask too much.

A psychologist says it is no wonder school children write "boners" since words in English have so many definitions; for example, game has 15 meanings, grain has 30 fall has 29 and account has 34.

It is reported that a light sprinkle of rain makes the average road one-third more slippery than a drizzling rain.

WINDERMERE A REAL CAMP

Striking while the iron is hot is a characteristic of the West that has gained the admiration of the rest of Canada. And so there is little surprise in the announcement that the Board of Trade at Invermere, B.C., has leased the bungalow camp at beautiful Lake Windermere for this summer, in anticipation of increased tourist traffic to the Canadian Rockies, which has been generally forecast in Europe, the Orient, and the United States.

The camp, which is being taken over by small but energetic investors, is one of the most delightfully situated in the Canadian Rockies. Built originally by the Canadian Pacific Railway, this camp has been successfully operated for the past

several years as a private camp for girls. In the centre of an ideal vacation district, it is easily reached by main mountain highways. The famous Banff-Windermere road leads to it, a good alternative route being through the mountains from Cranbrook. The lake averages about 50 feet deep in the summer and is ideal for swimming and boating. Excellent trout fishing can be had in several creeks and smaller lakes near by and the lake itself has landed salmon of considerable size. Within a day's ride is the celebrated Lake of the Hanging Glaciers, with six spectacular glaciers all concentrating in one month which an ice wall several hundred feet high which drops a continual succession of small icebergs into the lake.

The camp is a particularly good centre for a whole summer's rest and exploration, because many are the auto trips that can be made by car, mountain-bred ponies, or on foot to adjacent spots of beauty or historic interest. Tennis courts and motor launches are available for the use of the guests.

There is accommodation for 42 guests in the camp, which consists of a large main building with wide veranda, and of separate small bungalows, equipped with single beds, stove, clothes closet, nice furniture, running water, and electric lights. A double bath-house, with hot and cold running water, contains separate bath rooms.

CONTRACT AWARDED

When a corporation wishes to build a factory . . . When a town constructs new cement sidewalks . . . whenever large works are planned, the first step is almost invariably a request for bids on the work. This practice of competitive bidding has saved millions of dollars. It assures the town or corporation of getting the best value for every dollar spent.

The same system can be applied to your own buying. And you can save a proportionate amount of money. How? Simply by consulting the advertising pages of the paper!

When you find yourself in need of anything—don't rush out and buy the first one offered you. Exercise the power of selection that the advertisements give you. Read about them—what they are like and will do, who makes it and what it costs. Then, when you find the one that best suits your pocket book and needs, buy it! In this way you'll be spending your money wisely. You'll know what you're getting and how much it costs—before you buy it.

Every advertisement is the bid of some business firm for your trade; consider them carefully before buying

HIGH MINIMUM PRICE FOR WHEAT GRAIN MEN URGE

Urging upon the Dominion Government the fixing of the highest possible minimum price for wheat, a communication was forwarded July 20 to the Chief Commissioner of the Canadian Wheat Board and members of the wheat committee of the Dominion cabinet by C. E. Hayles, president of the North-West Grain Dealers' Association.

The North-West Grain Dealers Association memorandum points out that cost of food, fuel, clothing and sundries are 31 per cent. higher than in 1913 in which year the average price for one Northern wheat in store Fort William was 88 cents per bushel.

The communication released reads: "We understand from recent press reports that the minimum price for the current crop year for wheat will be determined and announced by your board and the government in the next week or ten days. Our Association placed in evidence before the recent Royal Grain Inquiry Commission the following:

"Volume 1, page 20. 'At this point I may state that my clients endorse wholeheartedly any movement for a relief of the farmers' burdens and for the granting of support as long as any condition, either national or international, external or internal, renders this relief and the support necessary for the maintenance of adequate living standards for farmers and their families.' And again, volume 1, page 20. 'If the deliberations of this commission are to have the constructive effect which it is desired we believe that it is, it is essential that the economic position of this western farmer in the national household is any enquiry directed towards these ends and in any movement to ameliorate this position, I am instructed to state that my clients were wholeheartedly joined.'"

"Bearing in mind the welfare of the producers may we respectfully, urge that your board and the government must give consideration to the relationship between the present costs of necessities and the price of wheat. We understand that recent statistics, released by the Dominion bureau of statistics, covering food, fuel, rent, clothing and sundries show that the average cost of these items for the year 1937 to be 31 per cent. higher than the cost of the same articles for the year 1913. The average price for No. 1 Northern wheat in store Fort William for year 1913 was 88¢. The handicap under which we believe our clients are laboring is set forth in the evidence given on our behalf by Mr. L. Beckington, K.C. volume 1, page 16, through 26, of the evidence of the recent Royal Grain Inquiry Commission. It is the hope of this Association that the Government will consider the highest possible minimum price consistent with the welfare of the Dominion of Canada."

CARD OF THANKS

We wish to thank our neighbors for their many acts of kindness during our recent bereavement, and to those who visit friends.

THE PATTERSON FAMILY

FEDERAL PROGRAM FOR PARK ROADS

The Dominion Government is spending nearly \$500,000 on Alberta highways this year, greater part of which is for the national parks, according to information given by James McKinnon, M.P., for West Edmonton.

While the Dominion has granted only \$75,000 to the province to assist to hard surface the Waterton Lakes park to Banff highway, Mr. McKinnon says that the Dominion is making a large outlay otherwise to develop parks, roads, which will be utilized for motor touring purposes.

Major federal expenditures in Alberta this year is \$500,000, which it is hoped will be sufficient to complete the Jasper-Lake Louise scenic highway.

At last reports, this highway was only 23 miles short of being completed. It is expected that work will be rushed this year so that the road, running through some of the most wonderful scenery on this continent, will be opened to general traffic in 1939.

The Dominion also is spending \$100,000 on hard surfacing highways in Banff national park, including the highway that runs to Radium, B.C.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Chautauque will return to Gleichen again next year, considerably more than one hundred persons having signed, guaranteeing the company the sale of 500 tickets at \$5, or \$1000.
